We help you with the most important thing for any startup: finding customers!

You have a great business idea. You are developing an amazing technology that has everything to become the next big thing. But getting a meeting with the right person within any large company or public organization is a real struggle.

That is where we come into play to match your startup with corporations, municipalities and public organizations that are actually looking for what you have to offer. Our core mission is to make it easier for Swedish startups to meet their first large customer and grow their business. There are a multitude of startups throughout Sweden (and the world) that can positively impact both the private and public sectors' ability to innovate. Together they can solve many of today's challenges faster and more cost effectively than if they attempted it alone. However it can often be difficult for them to connect with each other.
